RIGHT-SIZED PERFORMANCE

The J70 brings the same proven EAVision flight intelligence and spray precision found in the J150—scaled for personal acres and light custom work.

- Precision spray control with adjustable droplet sizing
- Intelligent terrain following and obstacle avoidance
- Consistent coverage without over-application
- Built on the same trusted EAVision platform

No entry-level compromises—just the right fit.

**During field testing. Actual results will vary due to field conditions, firmware evolutions, etc.*

THE J70 IS A GREAT FIT FOR:

- Farmers and smaller-scale custom applicators
- Row crop and specialty crop applications
- Highly sloped and challenging field conditions

RIGHT-SIZED PERFORMANCE

- 12 gal spray tank and 110 lb spreader load
- Max spraying speed: 30.7 miles/hour (45 feet/sec)* with full obstacle avoidance and terrain following enabled
- Spray flow rate: up to 6.3 gal/min
- Adjustable droplet sizes from 10 to 620 microns
- Covers up to 60 acres/hr at a 2 gallon per acre rate.

SMARTER TECHNOLOGY

- LIDAR technology enables industry leading obstacle avoidance and terrain following
- CCMS nozzles provide fine, uniform atomization with adjustable droplet sizes (10-620 microns) at up to 6.3 gallons per minute
- Enhanced atomizer nozzles combined with powerful motors allow for superior canopy penetration and great overall coverage for a variety of applications.
